The all-in-one lottery terminal

Proton is a next-generation all-in-one lottery terminal, designed for retail counters with limited space. Thanks to its very small footprint, it is ideal for use in small shops and in-lane applications.

Featuring an integrated camera, based on INTRALOT's superior imaging technology for reading palyslips and barcodes and an embedded thermal printer, Proton offers capabilities found in full size lottery terminals.

Featuring a future-proof design, Proton is the industry's smallest Lottery Terminal to utilize a camera technology for reading playslips and tickets.

- Patented ICON digital camera
- 10" adjustable touchscreen for increased ergonomics
- High processing power for rapid operations
- Multiple wired and wireless connectivity options
- Embedded printer with easy paper loading system
- Multiple security options
- Future-proof platform with no moving parts
- Small footprint: 30x16cm (DxW)
- ADA compliant
